	Curriculum Intent	The faculty's intent is to engage students in a curriculum that develops transferable skills, which they will apply in both a vocational and academic manner. The design of our curriculum encourages innovation in students and provides them with problem solving tools. Enterprise supports the learning of Mathematics through having to process numeric data, it also enhances students ICT and Computing skills. Through a variety of teaching and learning methods, including independent research, teamwork, competition and presentation activities, we hope to enhance employability skills and inspire young people			
	End Point	Students will gain an understanding of the travel and tourism industries and how their operation exists in the wider world of commerce.
